The Official Newsletter of the Edison IB MYP Personal Project

DREAM IT. BELIEVE IT. ACHIEVE IT.

Welcome to the MYP PP!

The personal projects are underway!

Throughout the month of October, 10th-grade students began their guided inquiry through Process Journal #1. This process journal has focused on the idea of Investigating. Students are exploring their own interests, methods of discovery/brainstorming, and narrowing down their thoughts to a personally motivating topic.

The personal project is a little different from typical school projects assigned in content courses because it follows the design cycle and embeds reflection. IB values the student's accurate and honest reflection more so than the product itself. This is why keeping detailed notes in the process journal is so important.

To help students with this process, they will be matched with a teacher-supervisor this month, who will serve as a mentor and resource. They will also refine their topic to a SMARTR Goal, in order to clarify and direct their project.

We are excited to see what our students can do even in these uncertain times.
